Operator + numeric contract
FFT / NTT / FWHT / zeta / structured
Workload domain
shape, batch, strides, placement
Hardware capabilities
local capacity, service rates, compatible cores
1 Derive regions and handoffs
A
B
handoff
closed regions -> predecessor sets
2 Characterize legal organizations
Dimension
Space
Time
Stages
Data tiles
0 1 2
state / traffic / ready work
checked against capacity and service
3 Bind cores and execute tiles
External handoff buffers
worker 0
tile 0
tile 2
tile 4
worker 1
tile 1
tile 3
tile 5
local core +
output placement
Same construction across storage scopes; one band and expansion factor 1 remain legal endpoints.
